Get a Fresh Start With Our Most Powerful Hearing Technology

With the new season comes new hearing technology. Here to bring a fresh take on helping those with severe to profound hearing loss is the Oticon Dynamo and Plus Power. The latest in power hearing aid options, these devices feature Oticon's innovative "brain first" approach, which recognizes that hearing happens in the brain.

Oticon Dynamo is the most powerful, compact BTE13 super-power device from Oticon, a hearing solutions manufacturer with a trusted reputation in hearing devices. Plus Power, the newest addition to the AGXO h300v2 series, is the world's smallest power-BTE solution and the most powerful solution in its class, designed for people with severe hearing loss.

POWER PERSONALIZED FOR YOUR NEEDS

"Adults with severe to profound hearing loss have generally been living with their hearing impairment for a long time — sometimes for decades," says Chris Cox, an audiologist with Audigy Group. "They know what they can and cannot hear, and they have very specific preferences based on their experience with many hearing devices over the years. To be able to serve their needs most effectively, our audiologists listen and learn from each individual."

BENEFITS

- Is fine-tuned to your unique hearing profile and sound preferences
- Offers the clearest sound possible to help your brain make sense of sound
- Allows you to enjoy better speech understanding and a more natural listening experience
- Enables a world of easy wireless connection to phone calls, music players, mobile and computer chats, podcasts, TV, and more — there is even an app for smartphones
- Can be worn in combination with a cochlear implant in the opposite ear

WHAT'S NEW

- Ability to access more of the important details of everyday conversation
- Speech Guard E and Speech Rescue™ features work together to protect the clarity of sound
- Speech Rescue "rescues" important speech frequencies that might otherwise be lost (like "s" and "th" sounds)
- Speech Guard E preserves the nuances of speech so that Dynamo wearers benefit from a full sound experience, even in challenging listening environments
