Buy one pack, get one free.  
Offer expires 12/29/17.

### FREE Clean & Check

of your current hearing devices.  
Offer expires 12/29/17.

## We've Moved!

On September 25 we moved to a bigger, better office. Located just across the office complex from our old space, this new office better accommodates our growing staff and your needs. All driving directions remain the same; just remember that we are in Ste C-48, in the building on the right side of the parking lot.

You don't need to do a thing besides come on in and visit! We encourage you to schedule your appointment for the holidays now, as spots fill up fast.

## Don't Be a Stranger: 6 Reasons to Come See Us

Linda Minnich, Patient Care Coordinator  
Janel Briggs, Au.D., Audiologist  
Janet Westlund, Au.D., Audiologist  
Deborah Muhleisen, M.S., Audiologist  
Jennifer Brown, Audiology Technician  
Stacy Wambold, Patient Care Coordinator

**Has it been a while since your last hearing checkup? Is your hearing aid warranty about to expire? Does your hearing seem to be changing? Might newer technology better fit your listening needs?**

Hearing well is important to you, and your hearing health is important to us. With so many tasks and activities competing for your time — especially during the holiday season — taking care of yourself can get short shrift.

If any of the following situations apply to you, take a moment for yourself and call us for an appointment.

- ♦ **TESTED BUT UNTREATED HEARING LOSS.** Getting your hearing tested was a crucial first step to hearing your best, but it's important to continue that journey if hearing help was recommended. Hearing aids not only improve your listening ability but can play a part in supporting your overall physical, mental, social, and even financial health.
- ♦ **UPCOMING WARRANTY EXPIRATION.** If you purchased hearing aids through our practice a few years back, your warranty may be expiring soon. We can help maximize and protect your investment by cleaning, checking, and performing selected repairs while the devices remain under warranty.
- ♦ **LAPSED HEARING EXAM.** Just like your other important senses such as sight, hearing changes over time — even more with age — so annual exams play an important role in ensuring you're hearing your best. If it's been more than a year since your last hearing test or you don't hear quite the way you used to, we can help.

- ♦ **EXCESS WAX BUILDUP.** Virtually no one likes to talk about it, but wax buildup happens, and we can help if it becomes a problem. Ears naturally remove wax as needed, but excess buildup — which can cause hearing loss, balance issues, and other challenges — should be handled by professionals.
- ♦ **TINNITUS.** That ringing, humming, or buzzing in your ear that no one else seems to hear isn't all in your head — it may be tinnitus, which can be associated with hearing loss or another underlying health issue. We can help get to the bottom of why it's happening and reduce its impact on your life.
- ♦ **OLDER TECHNOLOGY.** From Bluetooth® and smartphone compatibility to invisibility, hearing technology continues to evolve in exciting ways. We even have technology that works with telehealth services! If your devices are four or more years old, we can determine whether they're still meeting your needs and show you how far today's technology has come.

As your partner in keeping your  
hearing health on track, we'd love  
to see you! Call our caring team to  
schedule an appointment today.
